

## Quality Policy Statement

At Teyseer laboratories we are committed to quality as we provide services in sampling , testing and analysis of Construction materials (Raods and Buildings), Soil , Water, Aggregates, Concrete and Asphalt in accordance to the International Standards, Like BS , BSEN , ASTM and AASHTO with all the customer expectations, applicable regulations and stadards laid by National (QCS) and International bodies( BS , BSEN , ASTM and AASHTO ).

We ensure that accurate and timely testing services are done continuously to meet or exceedd the stated or implied customer requirments by following the requirements of ISO 17025:2005 Standard.

Our objective is to :

- All personnel concerned with testing and calibration activities familiarize themselves with the quality documentation and implement the policies and procedures at all times in their work.
- The laboratory`s staff committed to good professional practice, the quality of its examinations and compliance with the quality management system.
- Meet the current and future requirments of our customers with a commitment of attention to detail and service by all our staff
- To regularly take part in proficiency testing , interlab comparison tests with other labs .
- Training technicians to improve and encourage them to perform new tests and to familiarize themselves to latest International Standards .
- To attain latest lab equipment and technology to improve the quality of testing.

The management of Teyseer Laboratories is committed to follow the requirments of ISO 17025 standard and continuously improve the effectiveness of the management system .

Mr. Khalid Al-Mannai
